# storage SECTIONS

Tap to see  
all noteband  
section types.

Sections “A”, “B”, “C”, and “D” are designed to house collections of **related pages**. Dividers work within sections to partition large chunks of pages into smaller, more **manageable groups**. Built-in links help you find what you need quickly by transporting you to specific locations within your noteband. Links save you from needlessly swiping through irrelevant pages; label each one & use them wisely.

First, **map out the setup** of your new noteband. Jot down everything you plan to keep inside of it. It's digital — lasso parts of your written lists and move them around. There are infinite ways to categorize items. **Spend some time thinking about the solution** that makes the most sense to you. Over time and with consistent use, you'll refine your organizational methods. Apply everything you learn to future setup strategies & each noteband will be more efficient than the last.

helpful tips

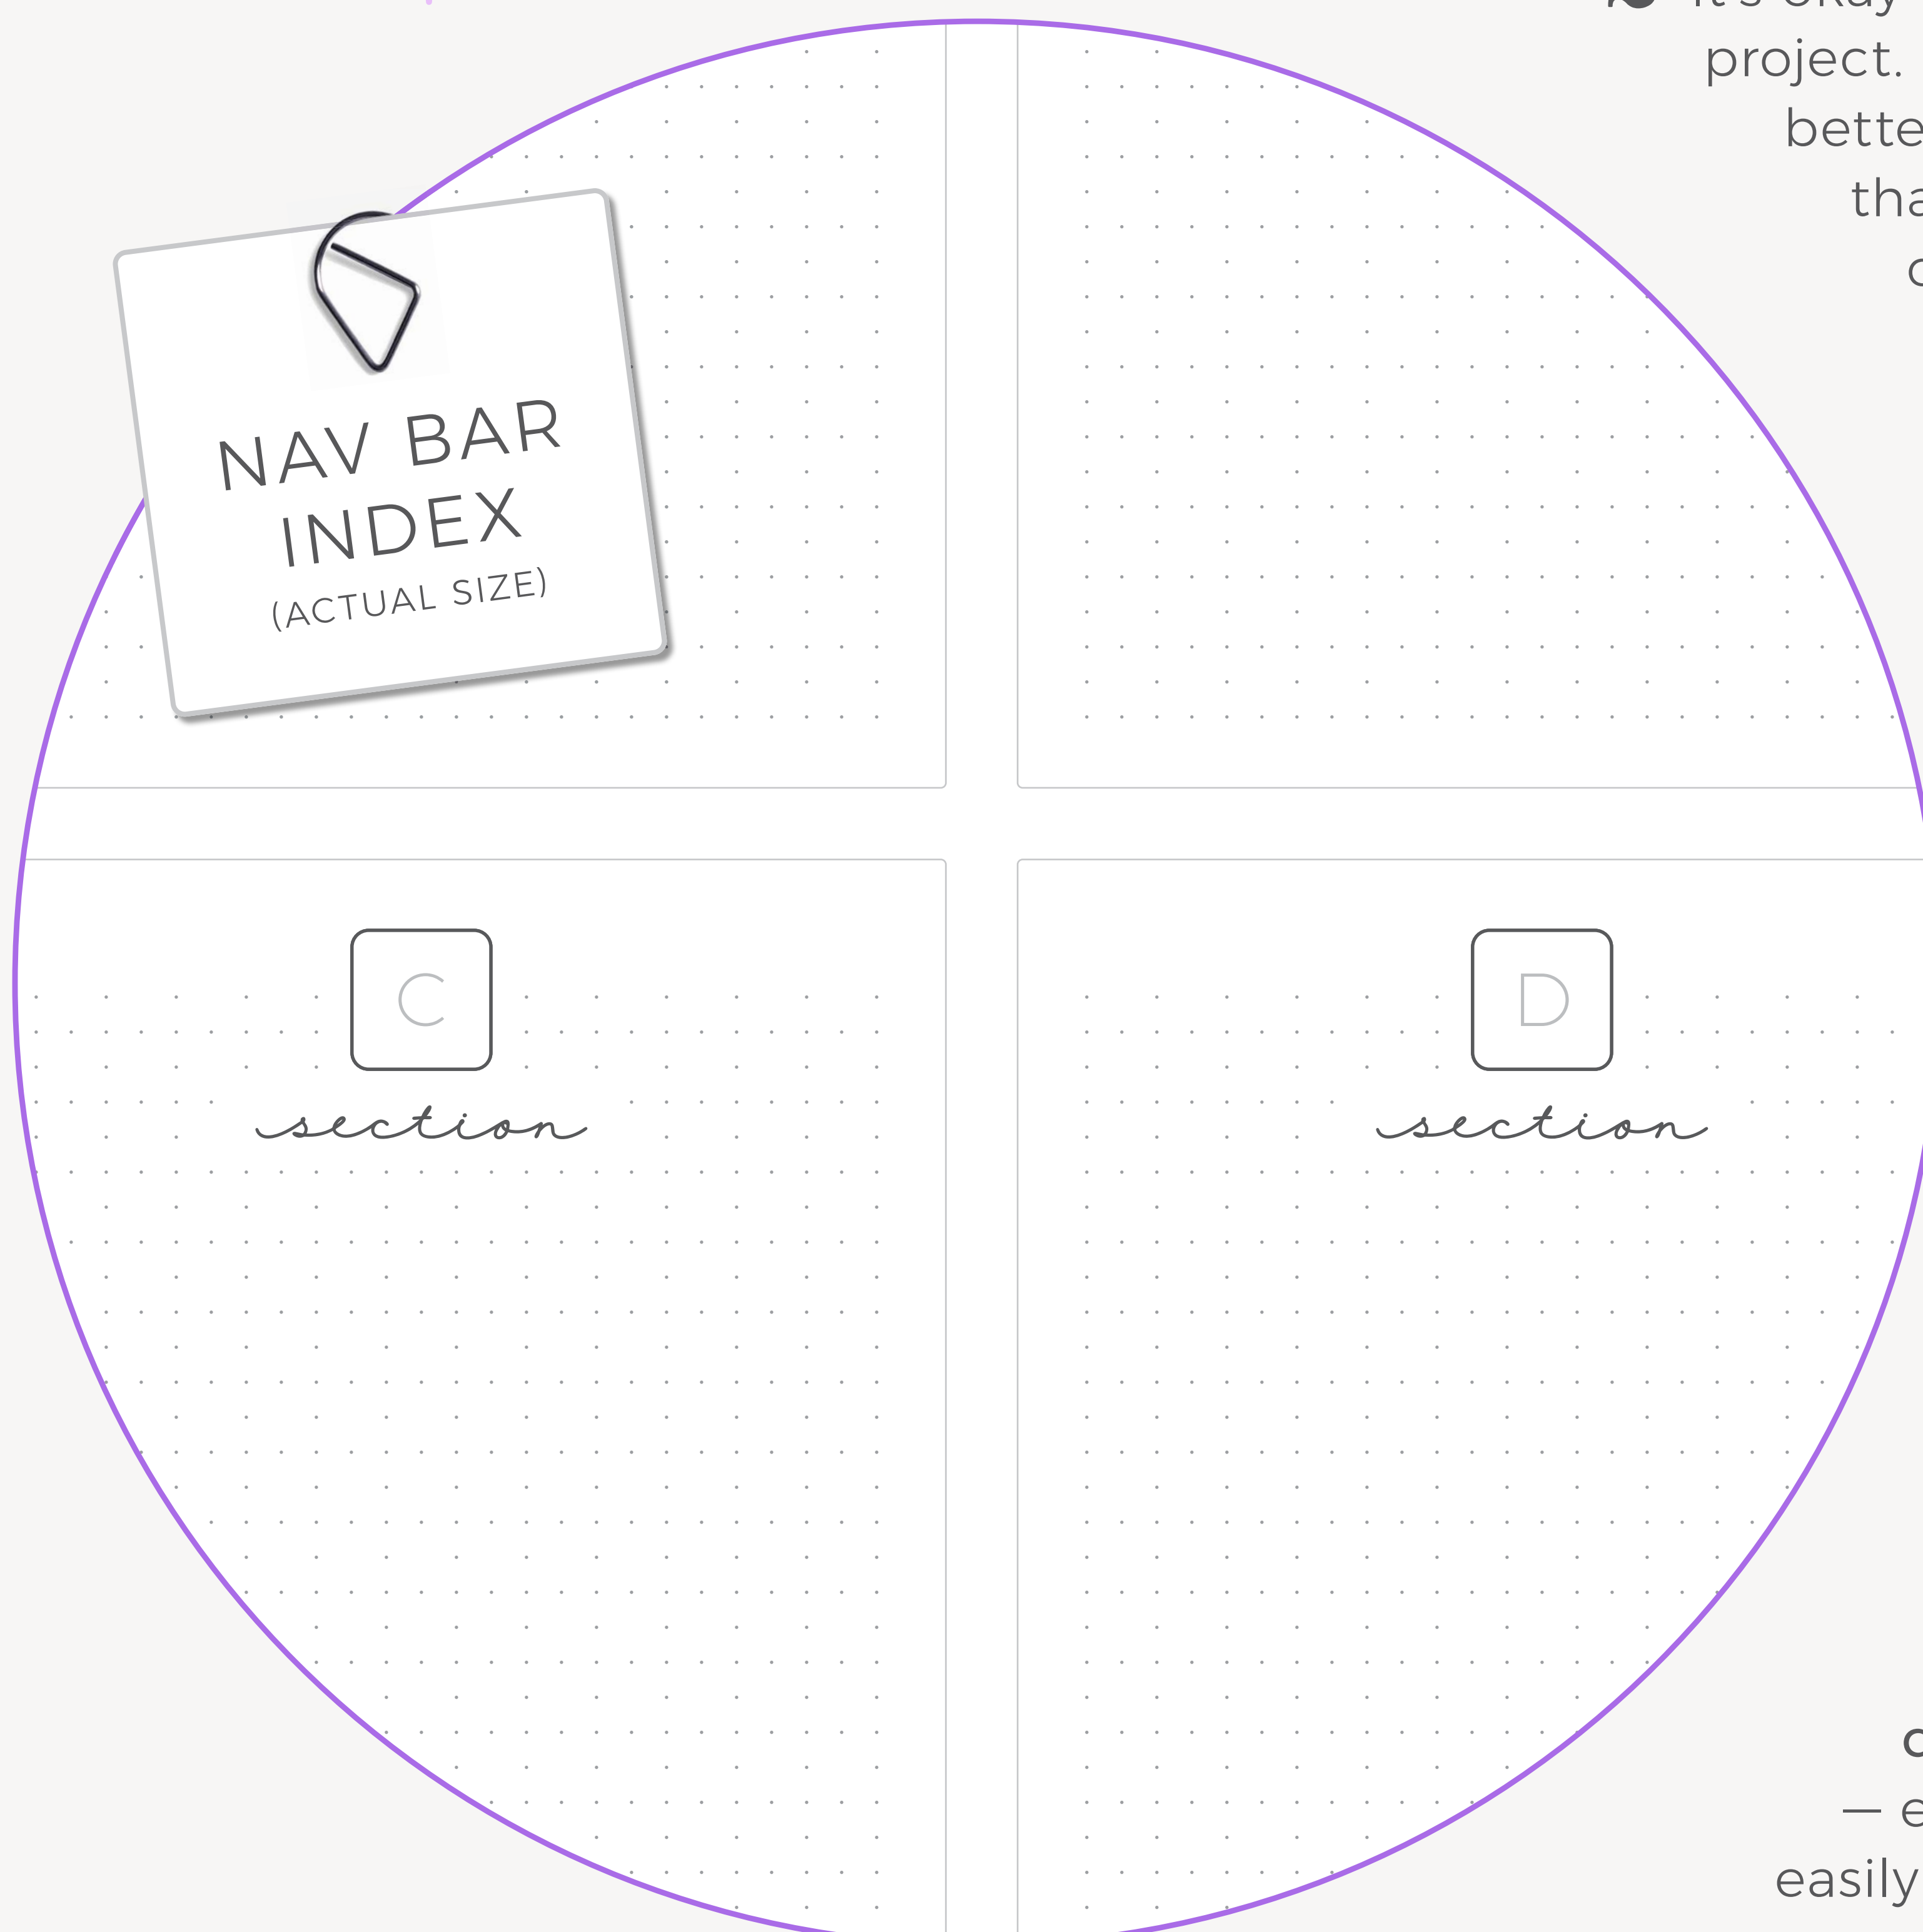

**1** If an item doesn't fit into a category **naturally**, don't **force it**. Don't overload your categories, and don't be afraid to leave dividers empty; your **content might grow** in ways you'd never expect.

**2** It's okay to **use more than one** noteband per project. Don't cram things into just one. It is better to have an under-filled noteband rather than one that is bursting at the seams. You can duplicate multiple fresh copies of your noteband & it's totally free — yet another perk of being digital!

**3** Take advantage of your preferred note-taking **app's folder structure** to add more levels to your categorization system.

**4** **Keep it simple.** Don't over-categorize. This is one reason it's a good idea to start with a mapping session. You'll recognize when you've over done it & have a chance to correct a bad plan before implementation.

**5** Don't forget about the other pages in your noteband. **Tab pages** are meant to keep odd bits that don't need a dedicated section. **Bookmark dividers** are meant to float around freely — each assigned to a frequented location & easily detachable.

DIGI PAPERS

There are often little bits & pieces (or even a few pages) of content that **don't fit organically into a category**. Instead of wasting an entire section for these types of things, store them behind a tab page. You may find a better home for them eventually, but it's perfectly fine if they live there permanently.

Tabs don't necessarily need to be defined right from the start. They **may come in handy later on** — long after the initial setup process. They are there when you need them but stay out of the way if you don't.

If you prefer, you can utilize your 9 tab pages as an **additional set of bookmarks**. Label the **tab index** to maintain an updated **overview** of how each one is being used. Tap any label on the index to access the corresponding tab page.

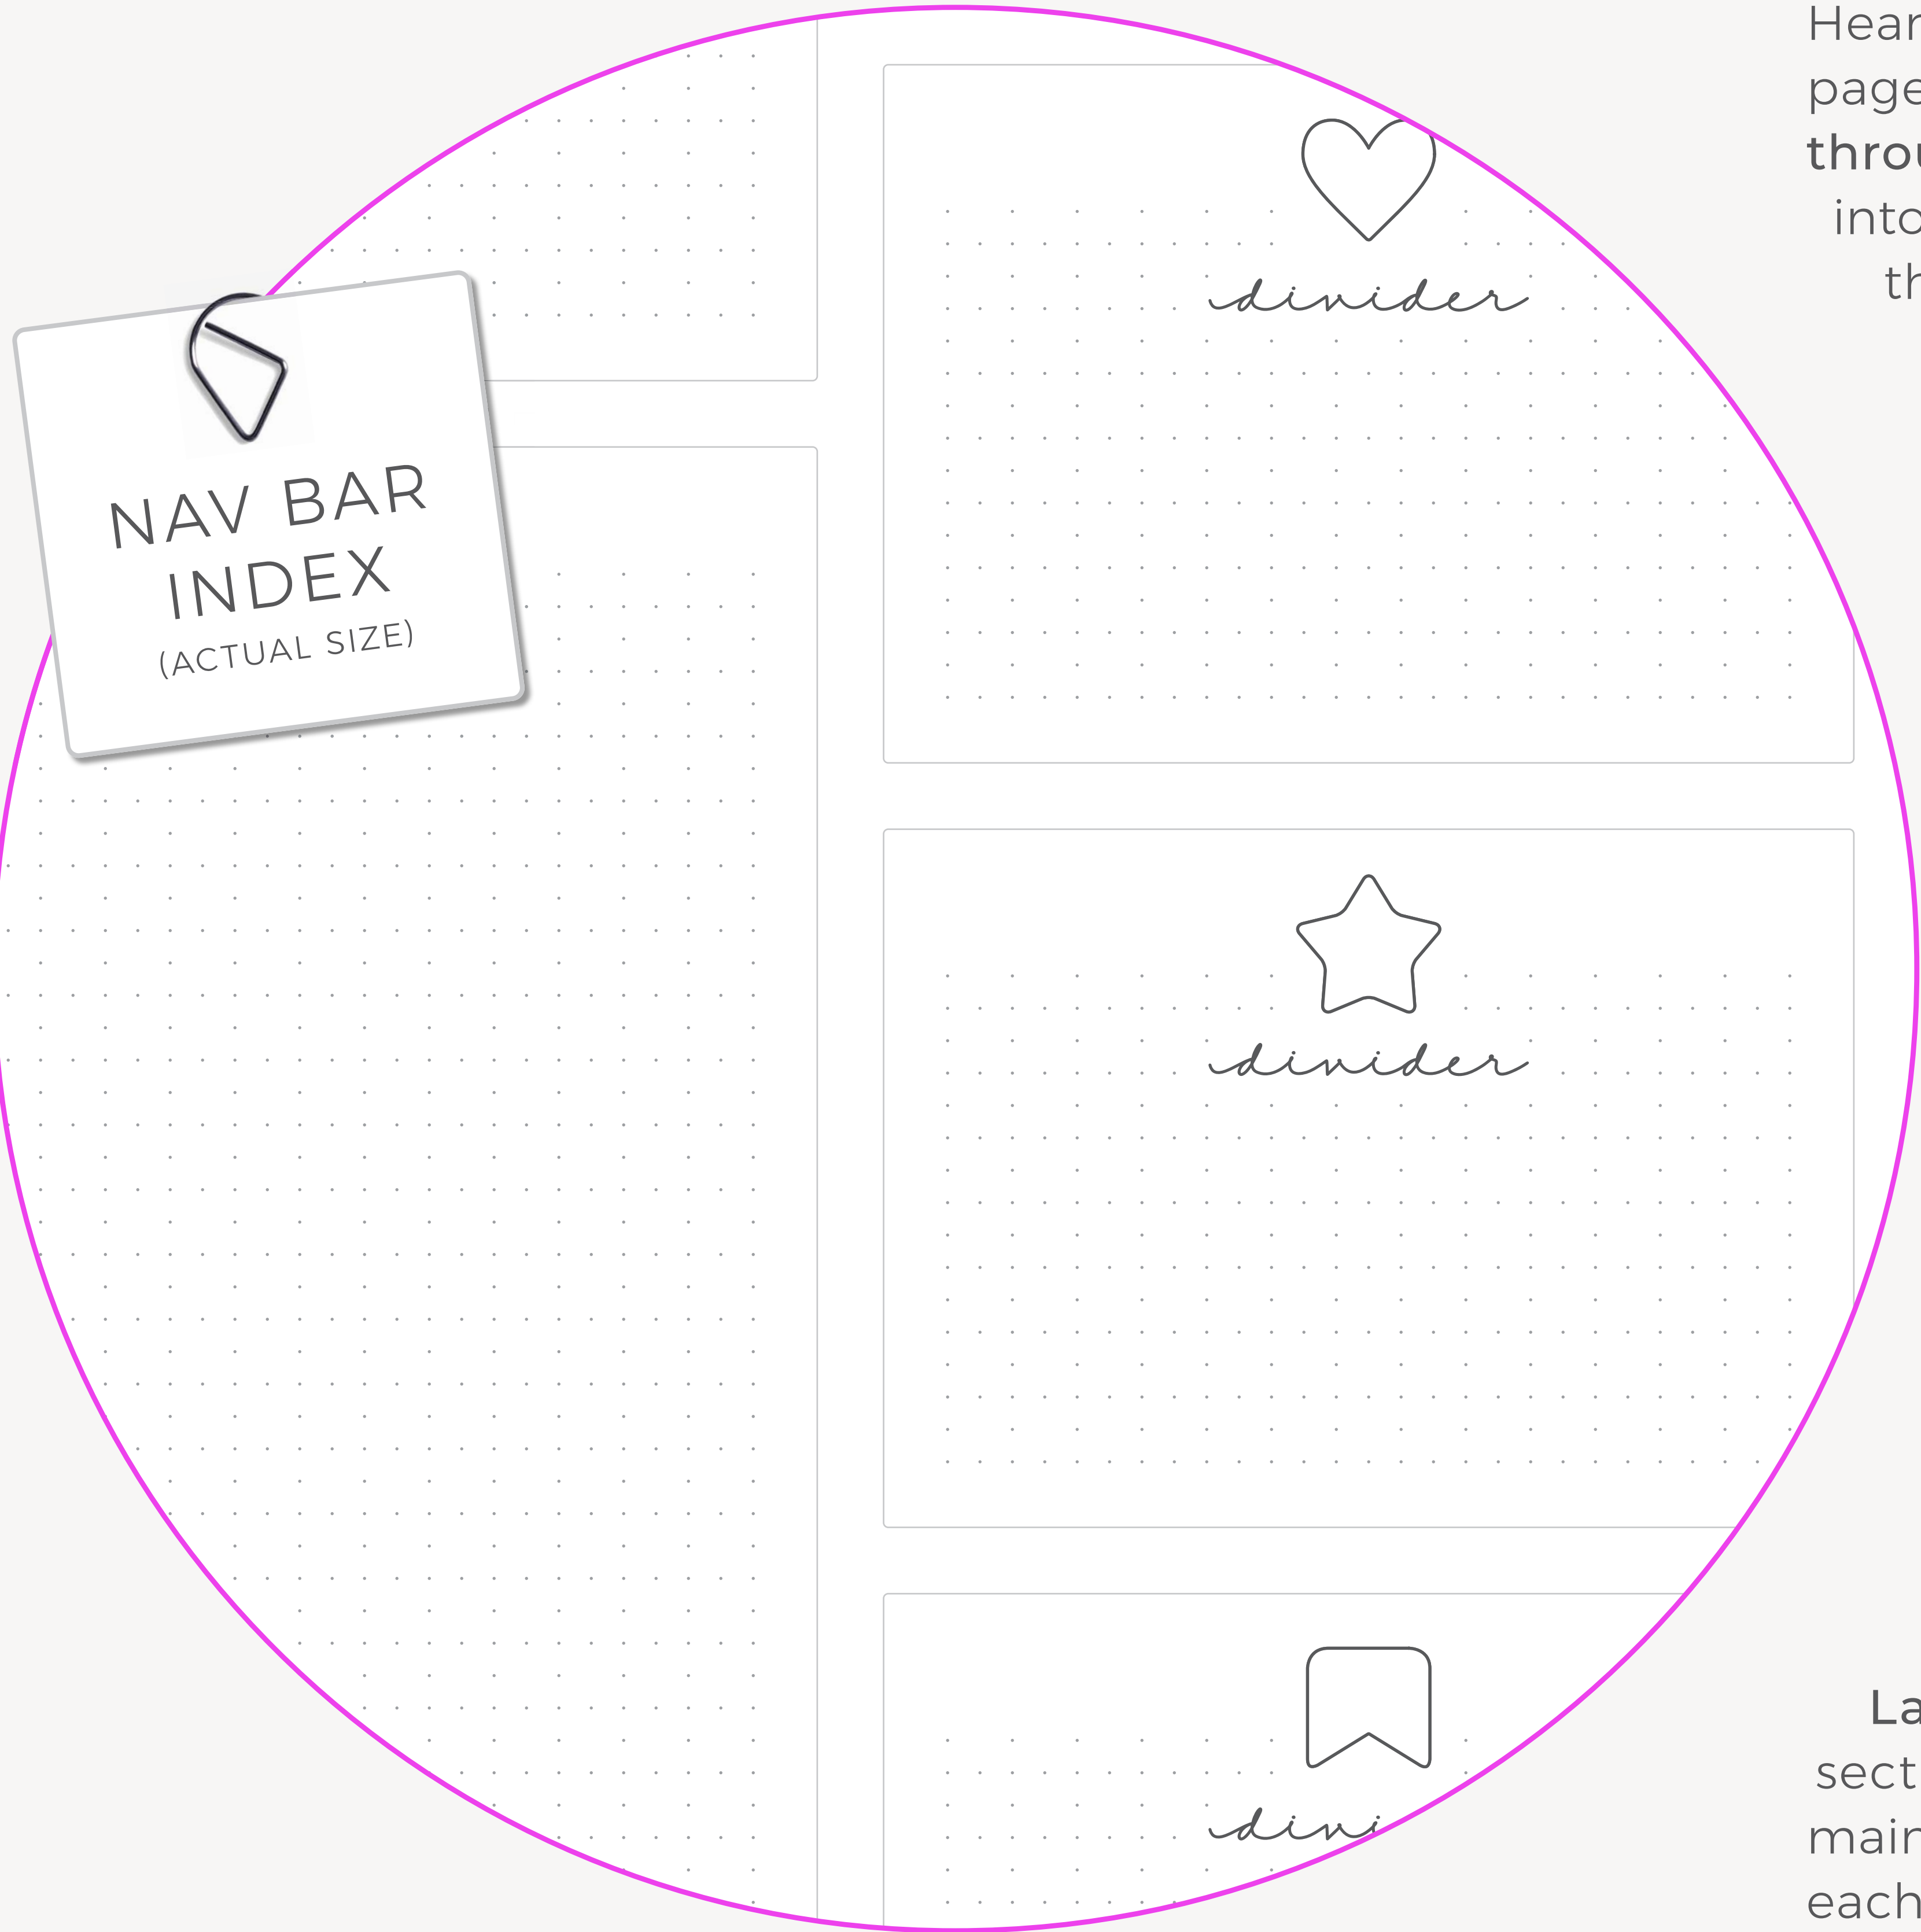

Heart, star, and flag bookmark divider pages are **meant to be moved freely throughout your noteband**. Drop one into place and temporarily associate that bookmark with that specific location. **Quickly access** your marked spot & **avoid swiping** through numerous pages by tapping the corresponding link in the **navigation bar**.

If you are a student, bookmarks are especially useful when taking daily notes in class lectures. Make a habit of moving a bookmark next to your last page of notes & **pick up right where you left off**.

If you would rather, you can use these versatile dividers for **additional storage** — the same as sections or tabs. It is totally up to you!

**Label** bookmark dividers & storage sections in the **nav bar index** to maintain an updated **overview** of how each page is being used.

# add-on inserts

## FUTURE OPTIONS

This space is reserved for **tutorials on merging inserts** with your noteband while preserving **functional navigation bar links** on all pages.

Eventually, there will be optional **add-on inserts** available in the shop. An insert is a single page (or a set of pages) that can be inserted into a **fresh copy** of your noteband. You'll be able to further **customize your noteband** with more digi paper options and also with specialized page layouts designed to serve very specific purposes.

I have a lot planned this year. I can't make any promises regarding specifics on release dates or insert availability. Just know that inserts will be a part of future offerings. Check back periodically or make sure to follow, like, and subscribe for updates.
